

NovaTech AI · Company Overview

NovaTech AI is a Series B artificial intelligence startup founded in 2023, headquartered in San Francisco with offices in London and Singapore. The company builds enterprise AI infrastructure that helps organizations deploy and manage large language models at scale.

Mission: Make production AI accessible to every engineering team.

Key Facts:

- Founded: March 2023
- Employees: 187 (as of Q1 2026)
- Funding: \$84M across Seed, Series A, and Series B rounds
- Customers: 340+ enterprise clients across 28 countries
- Annual Recurring Revenue: \$22M ARR (growing 180% year-over-year)

Core Products:

1. NovaDeploy · One-click LLM deployment platform supporting 40+ model architectures
2. NovaGuard · AI safety and content moderation layer with real-time monitoring
3. NovaRAG · Managed retrieval-augmented generation infrastructure (vector stores, chunking, embeddings)
4. NovaEval · Automated evaluation and benchmarking suite for production LLM applications

The company serves clients in financial services, healthcare, legal, and e-commerce, with notable customers including three Fortune 100 companies.

Engineering Team & Culture

Engineering Organization (112 engineers):

- Platform Team (28 engineers): Core infrastructure, Kubernetes orchestration, GPU scheduling
- ML Systems Team (24 engineers): Model serving, inference optimization, quantization
- Product Engineering (35 engineers): Full-stack development, API design, dashboard UIs
- Data Engineering (15 engineers): ETL pipelines, vector databases, embedding infrastructure
- Security & Compliance (10 engineers): SOC 2, HIPAA, GDPR compliance, penetration testing

Tech Stack:

- Languages: Python (primary), Rust (performance-critical), TypeScript (frontend)
- Infrastructure: Kubernetes on AWS EKS, Terraform, ArgoCD
- Databases: PostgreSQL, Redis, Pinecone (vectors), ClickHouse (analytics)
- AI/ML: PyTorch, vLLM, TensorRT, ONNX Runtime
- Frontend: Next.js, React, Tailwind CSS
- Observability: Datadog, OpenTelemetry, PagerDuty

Engineering Culture:

- Ship daily: Average 12 production deploys per day
- Blameless post-mortems for every incident
- 20% time for open-source contributions
- Weekly architecture review sessions
- Comprehensive on-call rotation with clear escalation paths

Product Roadmap · Q2-Q4 2026

Q2 2026 (Current Quarter):

- NovaRAG v2.0: Multi-modal RAG supporting images, tables, and charts in PDFs
- NovaGuard: Real-time toxicity detection with <50ms latency at 10K requests/sec
- Enterprise SSO: SAML 2.0 and OIDC support for all products
- SOC 2 Type II certification completion

Q3 2026:

- NovaDeploy: Support for Mixture-of-Experts models (Mixtral, DBRX)
- NovaEval: Automated regression testing for prompt changes
- Self-hosted deployment option for air-gapped environments
- Launch in AWS Marketplace and Azure Marketplace

Q4 2026:

- NovaAgent: Autonomous AI agent orchestration platform
- Multi-region deployment with data residency controls
- Real-time fine-tuning pipeline (LoRA/QLoRA)
- Launch NovaTech Developer Conference (NovaConf 2026)

Key Metrics Targets for 2026:

- ARR: \$22M · \$50M
- Customers: 340 · 800
- Uptime SLA: 99.95% · 99.99%
- Average inference latency: <200ms at P99

Financial Overview

Funding History:

- Seed Round (June 2023): \$4M led by Y Combinator and Sequoia Scout
- Series A (February 2024): \$18M led by Andreessen Horowitz
- Series B (November 2025): \$62M led by Lightspeed Venture Partners
Co-investors: Khosla Ventures, Databricks Ventures, NVIDIA NVentures
- Total Raised: \$84M with 24 months of runway at current burn rate

Revenue Breakdown (2025 Actuals):

- NovaDeploy: \$9.2M (42% of revenue)
- NovaGuard: \$5.5M (25% of revenue)
- NovaRAG: \$4.4M (20% of revenue)
- NovaEval: \$2.9M (13% of revenue)

Key Financial Metrics:

- Net Revenue Retention: 145%
- Gross Margin: 72%
- Customer Acquisition Cost: \$18,000
- Average Contract Value: \$65,000/year
- Payback Period: 8 months
- Monthly Burn Rate: \$2.8M

The company is targeting profitability by Q4 2027 with a path to \$100M ARR.

Competitive Landscape & Strategy

Direct Competitors:

1. Anyscale (Ray Serve) · Strong in distributed computing but less polished UX
2. Modal Labs · Developer-friendly but limited enterprise features
3. Baseten · Good model serving but lacks the full platform approach
4. Replicate · Consumer/developer focused, not enterprise-grade

Competitive Advantages:

- End-to-end platform: Deploy, monitor, evaluate, and secure · all in one
- Enterprise-ready: SOC 2, HIPAA, GDPR from day one
- Cost efficiency: 40% lower inference costs through proprietary optimization
- Speed: Average 3x faster cold-start times than nearest competitor
- Support: Dedicated solutions engineers for enterprise clients

Go-To-Market Strategy:

- Bottom-up adoption: Free tier for individual developers (NovaDeploy Free)
- Enterprise sales: Dedicated team of 24 account executives
- Partnerships: AWS, Azure, and GCP marketplace listings
- Community: 15,000+ developers in the NovaTech Discord community
- Content: Weekly technical blog, monthly webinars, annual conference

Strategic Moat:

The integration between NovaDeploy, NovaGuard, NovaRAG, and NovaEval creates a flywheel effect · customers who adopt one product typically expand to 2.4 products within 12 months, driving the 145% net revenue retention rate.
